POST-TREATMENT TIMELINE

What to Expect
& When

0–2
HRS

Immediately After

Skin appears flushed and warm — like a mild sunburn. The healing cascade has begun. Do not touch your face. Apply nothing beyond what your provider recommended. Avoid all sun exposure.

2–6
HRS

First Hours

Redness begins to settle. Skin may feel tight. After 90 minutes you may gently apply your recommended moisturizer and SPF 30+. Avoid makeup, exercise, and heat.

DAY
1–2

24–48 Hours

Redness fades. Skin may feel dry or tight — normal transepidermal water loss. Begin applying Procell Cellular Renewal Serum + Healing Accelerator after gentle cleansing, morning and night.

DAY
3–7

Days 3–7

Collagen production is actively ramping up. Skin may lightly flake — do not pick or exfoliate. Keep skin well moisturized. Mild itching is normal healing. Resume SPF daily.

WK
2–4

The Glow Phase

Skin texture visibly improves as collagen remodeling continues for up to 4 weeks. Resume normal skincare. Schedule your next session for best results.
