

Virtual Guideline

Prepare your client for the consultation appointment

The consultation is an opportunity to learn essential information about your client, their skin, and their skin goals.

- Send the questionnaire to your client prior to the consultation. This will allow you to review the questionnaire and identify any lifestyle factors or medical history that could interfere with the client's clearing process. Doing this allows you to address these topics during the consultation.
- In addition to the questionnaire, you will want to send the client agreement form and consent for them to sign. The agreement form ensures the client's understanding of the Face Reality system and partnership. Provide a copy of the agreement for the client to keep.
- Prior to seeing their skin during a video call, have them send you quality images of their skin.
- Conduct a thorough consultation – share the consultation packet with your client to review together or screenshare on zoom. Ask your client along the way if they have any questions and ensure they are following. It is a lot of information to digest!

BEST PRACTICES:

Jot form is a great tool to utilize to send these forms digitally. The option to save and store client files should be considered. Having reliable software to run virtual appointments is key. There are several options to choose from depending on what works best for you and your business.

Print the **Acne Consultation Script** to use as a guideline to conduct the Consult.

You can locate this document in your pro account in the Downloads

Utilize the **Acne Client Treatment Notes** to document each appointment. This is a template already created for you to notate your client's information. You can locate this document in your pro account in **Downloads**.

Create client's homecare and ship products

Homecare products are used twice a day to support clients' clearing journey, this is not optional but mandatory to achieve results.

- 💧 Utilize Acne Assist to create client's routine (link tool)
- 💧 Start slower with active ingredients products such as Acne Med and Serum
- 💧 Set expectations with your client—since we are working virtually, the clearing process may take longer, clear skin can still be achieved!
- 💧 Reiterate acne takes **30-90 days** (about **3 months**) to form, expect it to take more time at least a minimum of **6 months**—their commitment will factor into clearing timeline as well
- 💧 You can ship products from your business, or you can utilize our **Direct to Client** order form which allows you to ship products from our facility.
- 💧 If shipping directly to clients, create an order through your pos system and charge clients accordingly

BEST PRACTICES:

Working with a client is a true partnership, we can coach and provide products to support results, however it does take commitment. This is a terrific opportunity to explain the importance of their partnership and their use of the full Face Reality system.

Have an online store for clients to easily repurchase their products (**see Supply Agreement for online sales policy**)

Conduct client check in's

It is important to check in with your clients every two weeks for the first **6 to 8 weeks** to ensure proper home care routine adjustments and discuss lifestyle factors identified in the consultation appointment. Once clients are on their full routine, you can push these appointments out every **4 weeks** or so. Utilize this time to view client's skin and review photos together as needed.

- 💧 Have your client share photos with you at every check in
- 💧 Adjust home care routine if needed
- 💧 Discuss lifestyle factors and take notes for future follow-up
- 💧 Be available for your client to check in with you as needed via text
- 💧 Show clients their photos

BEST PRACTICES:

Charge clients accordingly for check-ins and the initial consultation appointment. Conduct check-in calls by **Zoom** or **Facetime** to get a good view of the skin and provide the client with the space to ask questions and for you to ask your client follow up questions. In addition, use this time to ensure your clients feel confident with their routine.

Provide a guideline for your clients on how to take pictures so you have a consistent view of the clients' progress

Print out the **Homecare Guideline** for clients younger than 16 and for weeks beyond week 6.
