

## Advanced Treatment Protocol: Face & Chest

### INTRODUCTION:

This advanced protocol is available exclusively for our Level 2 Certified Acne Experts. It is suitable for clients who do not struggle with an impaired barrier, dryness, or sensitivity. This protocol is especially helpful for clients who are focusing on PIE, PIH, and age management. Like our other protocols, this treatment can be performed every 2 weeks.

**Disclaimer:** Check with your State Board to ensure double exfoliation is within your scope of practice. If a client experiences dryness to the point where they cannot return to their homecare routine the next morning; have them skip their exfoliating serum for 3 days post treatment and apply either **Clearderma** or **Cran-Peptide Cream** after their **Advanced Acne Med.**

### TREATMENT ITEMS:

- Barrier Balance Creamy Cleanser
- Ultra Gentle Gel Cleanser
- Glycolic-Lactic Toner
- Sal-C Toner
- Hydrating Enzyme Treatment
- Clear Skin Peel 1
- hydraBalance Gel
- hydraCalm Mask
- Cran-Peptide Cream
- Daily SPF 30 Lotion

## STEP-BY-STEP

1

### FIRST CLEANSE (OPTIONAL)

**Barrier Balance Creamy Cleanser:**

Cleanse the entire area to be treated with a moderate amount of cleanser and rinse thoroughly with warm water.

2

### SECOND CLEANSE

**Ultra Gentle Gel Cleanser:**

Cleanse the entire area to be treated with a moderate amount of cleanser and rinse thoroughly with warm water. Pat Dry.

3

### TONE

**Glycolic-Lactic Toner:**

Dampen a cotton round with the **Glycolic-Lactic Toner** and wipe the area to be treated. If your client feels more than a 3 with the **GT** do not move forward with the **Clear Skin Peel** after the mask.

4

### EXFOLIATE

**Hydrating Enzyme Treatment:**

Without using steam, apply a layer of the **Hydrating Enzyme Treatment** mask. Ask the client if they feel any sensation and if so, what number 1 to 10. If they feel higher than a 3, do not move to the chemical peel after masking. Leave the enzyme on for 5 to 7 minutes, depending on their skin, and remove completely.

5

### HYDRATE

**hydraBalance Gel:**

Massage a generous amount of **hydraBalance Gel** into the skin prior to extractions. For inflamed acne, this will be a gentle application instead of massage.

6

### EXTRACTIONS

**Sal-C Toner:**

Following extractions, wipe the areas that have been extracted with the **Sal-C Toner**.

7

### HIGH FREQUENCY (OPTIONAL)

This optional step is helpful for reducing c. acnes bacteria and erythema post extractions.

8

### MASK

**hydraCalm Mask:**

Apply a generous amount of **hydraCalm Mask**. For additional soothing, massage with coldglobes or rollers. This is a great time for optional LED.

9

## CLEANSE

### Ultra Gentle Gel Cleanser:

Cleanse the entire area to be treated with a moderate amount of cleanser and rinse thoroughly with warm water. Pat Dry.

10

## TONE

### Glycolic-Lactic Toner:

Dampen a cotton round with the **Glycolic-Lactic Toner** and wipe the area to be treated. If your client feels more than a 3 with the **GT** do not move forward with the **Clear Skin Peel** after the mask.

11

## EXFOLIATE

### Clear Skin Peel 1:

Apply Clear Skin Peel 1 and ask for a number from 1 to 10. If they feel more than a 2, do not do a second layer. Let the peel sit for 3-5 minutes prior to applying moisturizer and sunscreen, you can fan the peel down during this time.

12

## FINISH

### Cran-Peptide Cream & Daily SPF 30 Lotion:

Apply a pea size amount of Cran-Peptide Cream and a quarter size amount Daily SPF 30 Lotion.
