

Acne Hydrating Treatment for Face or Back Procedure

INTRODUCTION:

Outlined below is the **Acne Hydrating Treatment** that is used for a client that is too dry, skin irritated, pregnant or nursing.

TREATMENT ITEMS:

- Barrier Balance Creamy Cleanser 16 oz
- Sal-C® Toner 16 oz or either Moisture Balance Toner 16 oz or Soothing Radiance Toner 16 oz (if pregnant or nursing)
- Hydrating Enzyme Treatment 8 oz
- hydraRemedy™ Gel Serum 4 oz
- Headband
- Cotton round pads
- Fan brush
- Small bowl for enzyme
- Gloves
- Towel for enzyme removal
- Extractor Tool

STEP-BY-STEP

1

CLEANSE

Barrier Balance Creamy Cleanser:

Cleanse the entire area to be treated with a moderate amount of cleanser and rinse thoroughly with warm water.

2

TONE

Soothing Radiance Toner:

Moisten a cotton round pad and swipe over the entire area to be treated thoroughly and evenly.

3 HYDRATING ENZYME TREATMENT (STEAM OPTIONAL)

Put 3 – 4 pumps of enzyme in a small bowl. Apply a thin layer of the **Hydrating Enzyme Treatment** with a fan brush to the area to be treated. Leave on for 7 minutes (5 minutes for inflamed acne) as tolerated and remove completely with a steam towel.

4 HYDRATE

Massage a generous amount of **hydraRemedy™ Gel Serum** into the skin to prepare for extractions.

5 EXTRACTIONS

The pores are now softened from the enzyme. Perform extractions then wipe the area thoroughly with **Sal-C® Toner** to finish up. You may perform High Frequency and/or LED Light Therapy for additional benefits. If your client is pregnant or nursing, apply **Soothing Radiance Toner** instead.

6 FINISH

If the appointment is during the day, gently apply Face Reality sunscreen if the treatment was performed on the face. If the appointment is in the evening, gently apply **hydraRemedy™ Gel Serum** and instruct the client to apply their **Advanced Acne Med** before bed. They won't need to cleanse tonight.
