

Bright Skin Peel 1 for Back Treatment Procedure

INTRODUCTION:

Outlined below is the procedure to use with the **Bright Skin Peel 1** on the back.

Do not perform this treatment on pregnant or breastfeeding clients without their physician's written approval.

NOTE:

If your client has experienced a treatment with Clear Skin Back Peel or Clear Skin Peel 3, and this is their first experience with the Bright Skin Peel 1, let them know that most people experience more tingling with the Bright Skin Peel 1.

TREATMENT ITEMS:

- Barrier Balance Creamy Cleanser 16 oz
- Ultra Gentle Gel Cleanser 16 oz
- Glycolic-Lactic Toner 16 oz
- Bright Skin Peel 1 solution 2 oz
- Sal-C® Toner 16 oz or either Moisture Balance Toner 16 oz or Soothing Radiance Toner 16 oz (if pregnant or nursing)
- Barrier Care Gel Cream 4 oz
- Sulfur Spot Treatment 4 oz
- Cotton round pads
- 4 x 4 esthetic wipe
- Fan brush
- Small bowl for peel
- Fan
- Extractor Tool
- Gloves
- Towels for peel removal

STEP-BY-STEP

1

CLEANSE

Ultra Gentle Gel Cleanser:

Cleanse the entire area to be treated with a moderate amount of cleanser and rinse thoroughly with warm water. Optional: If a double cleanse is performed use **Barrier Balance Creamy Cleanser** before **Ultra Gentle Gel Cleanser**.

2

TONE

Glycolic-Lactic Toner:

Glycolic-Lactic Toner is always used before a peel treatment to degrease the skin while acting as the **Treatment Tolerance Test**. Moisten a cotton round pad and swipe over the entire area to be treated thoroughly and evenly. Ask your client if they are experiencing any tingling. Utilize the number scale (1-10) to help determine what your client is feeling. On a scale of 1 to 10, 10 being extremely irritating, ask what number they are experiencing. If your client feels a “3” or more do not proceed with a peel. Choose the **Acne Hydrating Treatment** instead.

3

PEEL SOLUTION

Apply one thin layer of **Bright Skin Peel 1** on the entire area with a fan brush. Do not go over an area more than once. Ask the client if they feel any tingling using the number scale (1-10). If the client feels a 5 or more, remove the peel immediately. If the client feels a 4 or less, use a small fan to reduce any stinging or irritation. Leave on for 3 to 5 minutes as tolerated. Check in with the client every minute or so during the treatment to confirm that the peel is not feeling stronger or starting to irritate their skin.

Remove completely with a cool, wet towel. Rinse as needed. **The Bright Skin Peel 1 is NOT a self-neutralizing peel. It must be removed completely from the skin.**

4

EXTRACTIONS

The pores are now softened from the peel solution. Perform extractions then wipe the back thoroughly with **Sal-C® Toner** to finish up. If your client is pregnant or nursing, apply **Soothing Radiance Toner** or **Moisture Balance Toner** instead.

5

SULFUR SPOT TREATMENT (OPTIONAL)

For inflamed acne, **Sulfur Spot Treatment** can be applied for calming and antibacterial action to the extracted area. After 3 to 5 minutes, remove the Sulfur Spot Treatment by wiping with a 4 x 4 esthetic wipe soaked with **Soothing Radiance Toner** or **Moisture Balance Toner**. **Do not apply if the client is allergic to sulfur.**

6

FINISH

Gently apply **Barrier Care Gel Cream** if needed.
