

Clear Skin Back Peel Treatment Procedure

INTRODUCTION:

Outlined below is the **Clear Skin Peel** procedure for the back. Do not perform this treatment on pregnant or breastfeeding clients without their physician's written approval.

TREATMENT ITEMS:

- Barrier Balance Creamy Cleanser 16 oz
- Ultra Gentle Gel Cleanser 16 oz
- Glycolic-Lactic Toner 16 oz
- Clear Skin Back Peel 2 oz (or Clear Skin Peel 2, or Clear Skin Peel 3 if client is sensitive or Fitz 4-6)
- Sal-C® Toner 16 oz
- Sulfur Spot Treatment 4 oz (optional)
- Barrier Care Gel Cream 4 oz (optional)
- Cotton round pads
- 4 x 4 esthetic wipe
- Fan
- Extractor Tool
- Gloves

STEP-BY-STEP

1

CLEANSE

Ultra Gentle Gel Cleanser:

Cleanse the entire area to be treated with a moderate amount of cleanser and rinse thoroughly with warm water. **Optional:** If a double cleanse is performed **Barrier Balance Creamy Cleanser** can be used before **Ultra Gentle Gel Cleanser**.

2

2 TONE

Glycolic-Lactic Toner:

Glycolic-Lactic Toner is always used before a peel treatment to degrease the skin while acting as the **Treatment Tolerance Test**. Moisten a cotton round pad and swipe over the entire area to be treated thoroughly and evenly. Ask your client if they are experiencing any tingling. Utilize the number scale (1-10) to help determine what your client is feeling. On a scale of 1 to 10, 10 being extremely irritating, ask what number they are experiencing. If your client feels a “3” or more do not proceed with a chemical peel. Opt for the **Acne Hydrating Treatment** instead.

3

3 PEEL SOLUTION

Take a 4 x 4 cotton esthetic wipe and fold it in half. Place the dry cotton pad directly onto the open bottle of **Clear Skin Back Peel** solution. If your client is sensitive or Fitz 4-6 you may use **Clear Skin Peel 2** or **Clear Skin Peel 3** in place of the **Clear Skin Back Peel**. Invert the bottle, making a circle of solution on the pad. Move the bottle around the pad and repeat this six times in a circle.

Beginning at the top of the back, wipe evenly and apply the peel in panels to cover the entire back area. Do not go over an area more than once. Ask the client if they feel any tingling using the number scale (1-10). Fan the back to reduce tingling. If tingling does not calm down within two minutes, apply the **Barrier Carer Gel Cream** while continuing to fan their back. This should help reduce the tingling sensation.

If they felt less than a “3” with the first layer, apply one more layer of the peel solution and fan it down. If the client feels more than a “3” and tingling does not calm down within two minutes, apply the **Barrier Carer Gel Cream**. This should help reduce the tingling sensation. Do not apply **Barrier Carer Gel Cream** if there isn’t a need to reduce any tingling sensation.

4

4 EXTRACTIONS

The pores are now softened from the peel solution. Perform extractions then wipe the back thoroughly with **Sal-C® Toner** to finish up. You may perform High Frequency and/or LED Light Therapy for additional benefits.

5

5 SULFUR SPOT TREATMENT (OPTIONAL)

For inflamed acne, **Sulfur Spot Treatment** can be applied for calming and antibacterial action to the area extracted. After 3 to 5 minutes, remove the Sulfur Spot Treatment by wiping with a 4 x 4 esthetic wipe soaked with **Soothing Radiance Toner** or **Moisture Balance Toner**. Do not apply if the client is allergic to sulfur.

6

6 FINISH

If needed, gently apply **Barrier Carer Gel Cream** to reduce any residual tingling.
