

Clear Synergy Peel for Face & Chest Treatment Procedure

INTRODUCTION:

Outlined below is the procedure to use with **Clear Synergy Peel 1**, **Clear Synergy Peel 2**, and **Clear Synergy Peel 3**. Do not perform this treatment on pregnant or breastfeeding clients without their physician's written approval.

TREATMENT ITEMS:

- Barrier Balance Creamy Cleanser 16 oz
- Ultra Gentle Gel Cleanser 16 oz
- Glycolic-Lactic Toner 16 oz
- Clear Synergy Peel 1, Clear Synergy Peel 2, or Clear Synergy Peel 3—2 oz
- Sal-C® Toner 16 oz
- Sulfur Spot Treatment 4 oz (optional)
- Barrier Care Gel Cream or Cran-Peptide Cream 4 oz (optional)
- Headband
- Cotton round pads
- 4 x 4 esthetic wipe
- Fan
- Extractor Tool
- Gloves

STEP-BY-STEP

1

CLEANSE

Ultra Gentle Gel Cleanser:

Cleanse the entire area to be treated with a moderate amount of cleanser and rinse thoroughly with warm water. **Optional:** If a double cleanse is performed use **Barrier Balance Creamy Cleanser** can be used before **Ultra Gentle Gel Cleanser**.

2

TONE

Glycolic-Lactic Toner:

Glycolic-Lactic Toner is always used before a peel treatment to degrease the skin while acting as the **Treatment Tolerance Test**. Moisten a cotton round pad and swipe over the entire area to be treated thoroughly and evenly. Ask your client if they are experiencing any tingling. Utilize the number scale (1-10) to help determine what your client is feeling. On a scale of 1 to 10, 10 being extremely irritating, ask what number they are experiencing. If your client feels a “3” or more do not proceed with a chemical peel. Opt for the **Acne Hydrating Treatment** instead.

3

PEEL SOLUTION

- Select the appropriate **Clear Synergy Peel** level based on your client's needs and treatment history. For new or more sensitive clients, always begin with **Clear Synergy Peel 1**. Strength may be increased over time as tolerance is established.
- Take a 4 x 4 cotton esthetic wipe and fold it in half and then fold it in half one more time. Place the wipe directly onto the open bottle of **Clear Synergy Peel 1** and invert the bottle so the solution is transferred to the pad. Move the bottle around the pad and repeat this **six times** in a circle.
- Starting on the forehead, wipe evenly and apply the peel in panels to cover the entire facial area and upper neck, avoiding the eye area. Do not go over an area more than once. Ask the client if they feel any tingling using the number scale (1-10). **If the client feels a 5 or more, do not proceed with another layer and remove with Barrier Balance Creamy Cleanser.**
- When there is no excessive erythema or blanching, and if the sensation has dissipated after 2 minutes of fanning, apply a second layer. **If the sensation has not dissipated after 2 minutes, do not apply a second layer.**
- For first time clients do not exceed 1 layer and remove with **damp esthetic wipes**.
- For all clients, do not exceed 2 layers.
- Remember to wait 1–2 minutes between layers to assess client comfort.
- Observe for excessive erythema, blanching, or discomfort. Do not proceed if these occur and cleanse with **Barrier Balance Creamy Cleanser** immediately to stop peel activity. Do not add water to the **Barrier Balance Creamy Cleanser** but do remove with a damp towel or esthetic wipes.
- Out of an abundance of caution to avoid salicylic acid toxicity, or salicylism, there is **not a back protocol using the Clear Synergy Peels**.

4

EXTRACTIONS

The pores are now softened from the peel solution. Perform extractions then wipe the face thoroughly with **Sal-C® Toner** to finish up.

5

SULFUR SPOT TREATMENT (OPTIONAL)

For Inflamed acne, **Sulfur Spot Treatment** can be applied to the affected area for calming and antibacterial action. After 3 to 5 minutes, remove the **Sulfur Spot Treatment** by wiping with a 4x4 esthetic wipe soaked with **Soothing Radiance Toner** or **Moisture Balance Toner**. Do not apply if the client is allergic to sulfur.

6

FINISH

If the appointment is during the day, apply a Face Reality mineral sunscreen. If the appointment is in the evening, apply **Barrier Care Gel Cream** or **Cran-Peptide Cream**, depending on the client's skin type, if needed to reduce any residual tingling.
