525 E Olympia Ave, Unit 9 | Punta Gorda, FL 33950

Advanced aesthetics & wellness | Walk-ins welcome; appointments recommended

MEDICAL DIRECTOR: JOSHUA SHAW, MD | FL LIC. ME136232

WHY CLIENTS SAY YES

A refresh that still looks like you.

PRF begins with a small sample of your own blood. The platelet- and fibrin-rich portion is prepared the same day and used in a personalized facial-aesthetics plan.

- Client-derived - created from you
- Designed for subtle, natural-looking change
- No synthetic filler material in PRF or EZ Gel
- A plan tailored to your features and goals

PRF EZ GEL UNDEREYES

PRF EZ Gel under-eyes

One client's individual result. Treatment plan, timing and response vary.

HOUSE OF ROSE
AESTHETICS

PLATELET-RICH FIBRIN

Your most personal skin investment.

A natural-looking refresh, created from you.

INJECTABLE PRF • EZ GEL • TOPICAL PRF

MODEL SHOWN | INDIVIDUAL OUTCOMES VARY

Real skin. Thoughtful expectations. Beautifully personal.

PRF, designed around the face you already love.

TARGETED RENEWAL • SUBTLE VOLUME • LUMINOUS SKIN QUALITY

The wow is not looking different. It is looking rested, refined and unmistakably like yourself.

THE VISIBLE PAYOFF

**Look more rested.
Feel more confident.
Still look like you.**

PRF is for the client who wants visible refinement without an overfilled or overdone look.

- A brighter, more refreshed under-eye appearance
- Softer-looking fine lines and crepey texture
- Smoother-looking texture and more even-looking tone
- Fresh radiance and improved overall skin quality
- Subtle, temporary volume with EZ Gel where appropriate

WHY IT FEELS DIFFERENT

PRF does not ask your face to become someone else's. It supports a gradual, personalized approach built around your own features.

CHOOSE YOUR PATH

Three ways to make PRF personal.

01 INJECTABLE PRF

Placed in select facial areas by a registered nurse for targeted under-eye concerns, fine-line appearance and overall skin quality.

BEST FOR: a tired, shadowed or crepey under-eye look; targeted facial refinement.

02 PRF EZ GEL

Your PRF is gently processed into a soft, client-derived gel designed to add subtle, temporary volume while supporting natural-looking rejuvenation.

BEST FOR: delicate areas where a softer, more gradual alternative to synthetic filler is preferred.

03 TOPICAL PRF + NEEDLING

PRF is applied to the skin surface during a selected microneedling or microchanneling service to complement the skin-renewal experience.

BEST FOR: the appearance of texture, tone, fine lines and radiance across the treated surface.

YOUR EXPERIENCE

**One small blood draw.
One highly personal plan.**

- 1 CONSULT**
We assess your goals, anatomy, health history and candidacy.
- 2 PREPARE**
A small sample of your blood is drawn and centrifuged the same day.
- 3 PERSONALIZE**
Your provider selects liquid PRF, EZ Gel or topical application.
- 4 REVEAL**
Changes develop progressively, with timing and maintenance tailored to you.

YOUR NEXT STEP

Let us show you what your own biology can do.

Walk-ins welcome; appointments recommended.

Not every client is a candidate. Injectable PRF and EZ Gel are RN-performed under medical direction; topical PRF is surface-applied during a selected facial service. Final treatment, placement, timing and combinations are confirmed after assessment. Temporary redness, swelling, tenderness or bruising may occur. Individual outcomes vary.
