## Platelet-Rich Fibrin (PRF)

### What is PRF?

Platelet-Rich Fibrin (PRF) is a next-generation regenerative treatment created from a small sample of your own blood. Unlike PRP, PRF is processed without anticoagulants, allowing a natural fibrin matrix to slowly release platelets, growth factors, and white blood cells over time. This supports your body's natural healing process and stimulates collagen production for healthier, more youthful-looking skin.

### Benefits of PRF

- 100% natural using your own blood
- Stimulates collagen and elastin production
- Improves skin texture, tone, and elasticity
- Softens fine lines and wrinkles
- Enhances skin quality naturally over time
- Little to no downtime
- Long-lasting regenerative effects
- Safe for patients seeking a natural alternative to synthetic products

### Common Treatment Areas

- Under-eye hollows and dark circles
- Face and cheeks
- Fine lines and wrinkles
- Neck and décolleté
- Acne scars
- Hands
- Scalp for hair restoration

### PRF Hair Restoration

PRF injections deliver concentrated growth factors directly to the scalp to support healthier hair follicles, reduce shedding, and encourage thicker, stronger hair growth. A series of treatments is typically recommended for best results.

### What to Expect

A small blood sample is drawn and placed in a specialized centrifuge to separate the PRF. The PRF is then injected into the treatment area or used with microneedling. Treatments usually take 45–60 minutes. While some improvement may be seen after the first treatment, optimal results are generally achieved with a series of 3–4 sessions spaced 4–6 weeks apart.

### Why Choose PRF?

PRF works with your body's own regenerative abilities rather than simply adding volume. It is an excellent option for patients seeking gradual, natural-looking rejuvenation with minimal downtime and continued collagen stimulation.

## **Who is a Good Candidate?**

PRF is ideal for healthy adults who want to improve skin quality, rejuvenate the under-eye area, stimulate hair growth, or enhance healing after aesthetic procedures. A consultation will determine if PRF is right for your individual goals.

## **Schedule Your Consultation**

Discover the benefits of regenerative aesthetics with a personalized PRF treatment plan. Our experienced team will help determine the best approach to achieve your aesthetic and wellness goals.
