

M17 AI Skin Analysis

Team Cheat Sheet — 18 Indicators, Scripts & Service Mapping

Amber · Advanced Facials | **Diana, RN** · Injectables & IV
Brandy · Basic Facials | **Aundrea** · Waxing, Lashes & Makeup

THE ONE RULE THAT OUTRANKS EVERYTHING.

The M17 analyzes the **appearance** of skin. It does not diagnose anything. It **scored** an indicator — it never "found" or "detected" a condition. Say **"supports the appearance of."** Never say **"treats / cures / clears."**

Say this out loud on every scan: *"Final treatment combinations and candidacy are confirmed by your licensed provider based on candidacy, contraindications, and local regulations. Not every client is a candidate for every service, and outcomes are individual."*

THE CONSULT FLOW — 7 MINUTES, EVERY SCAN

- 1

Scan — and narrate it.

"This isn't a photo filter — it's ten different light sources. Some read the surface, some see under it, and the UV light shows sun history and pore activity your eye can't see yet. About three minutes."
- 2

Then shut up for ten seconds.

Let them look. They will point at something. **Whatever they point at is what you sell.**
- 3

Rule of Three.

Do not read eighteen numbers. Pick the three lowest and talk about only those. Eighteen numbers is a lecture; three numbers is a plan.
- 4

Lead with a win.

Find their best score and say it first. "Your hydration is genuinely strong — that's the hardest one to fake in this climate." Trust buys permission.
- 5

Name the lane, name the provider.

"That's Diana's lane." / "That's mine." Cross-referral is the entire point of the machine.
- 6

Present the series, not the single.

Anchor on 3× or 6×. The single is the downgrade — never the opening offer.
- 7

Book the 90-day rescans.

"Same machine, same lighting, same angles — so it's a real comparison, not a memory." **This is the retention loop. Never skip it.**

HOW THE MACHINE WORKS — 20MP · 10-SPECTRUM · 18 AI-SCORED INDICATORS

LIGHT CHANNEL	WHAT IT PHYSICALLY SEES	DRIVES
RGB / normal	Surface — what the eye sees	Texture, Wrinkle, Acne, Pores
Cross-polarized	Cancels shine → sees <i>into</i> the skin	Dermis Pigment, Sensitivity, Spider Vein
Parallel-polarized	Amplifies surface reflection	Texture, Pores, Sebum, Comedo
UV (365nm)	Fluorescence — bacteria + sun history	Porphyryns , UV Damage, Clogged Pore
Brown band	Melanin distribution	Epidermis Pigment, Brown Area, Melasma
Red band	Hemoglobin / vascularity	Sensitive Area, Spider Vein, Thermal map
AI composite	Multi-band model	Moisture, Collagen, Skin Age, Future Aging

Scoring: 0–100 per indicator plus an age-group percentile. **Lower score = more of that condition present.** Bottom third = a talking point. Confirm polarity on your first few scans.

GROUP A — PORE & OIL (the acne / congestion lane)

INDICATOR	SAY THIS	NEVER SAY	BOOK	WHO
1. Pores	"Your pores are reading larger through the T-zone — that's usually oil volume plus a little loss of firmness around the opening."	"We'll shrink your pores."	ProCell Pro \$250 Glo2Facial \$195	Amber
2. Sebum	"Here's your oil map. That's not a flaw — it's information about what your barrier is compensating for."	"You have oily skin, that's the problem."	Skin Reset \$140 Face Reality homecare	Brandy
3. Comedo	"These are comedones — congestion that hasn't surfaced yet. This is the most treatable thing on your whole report."	"Blackheads — we'll extract them and they'll be gone."	Signature Facial \$120 Dermaplane prep +\$45	Brandy Amber
4. Clogged Pore	"You've got impaction showing under UV before it's visible in the mirror — this is exactly why we scan first."	"Your pores are dirty."	Glo2Facial \$195 Acne Bootcamp \$899	Amber
5. Porphyrins ★	"Those bright dots under the UV are porphyrins — a marker of bacterial activity inside the pore. It's the single best predictor of where your next breakout shows up. What you're looking at is next month's skin. That's the whole argument for a program instead of a one-off facial."	"You have a bacterial infection." / "We'll kill the bacteria."	Acne Bootcamp 12 wk \$899 Face Reality	Amber

★ **PORPHYRINS IS YOUR MONEY SLIDE.** Fluorescing byproduct of *C. acnes* bacteria inside the follicle. Clients have never seen it, it looks dramatic, and it predicts *future* breakouts — which makes it the most honest, least pushy upsell on the machine. Lead every acne conversation here.

GROUP B — PIGMENT & SUN (the brightening lane)

INDICATOR	SAY THIS	NEVER SAY	BOOK	WHO
6. Epidermis Pigment	"This is surface pigment — it sits shallow, which is good news. Shallow responds."	"We'll erase these spots."	BioRePeel ProCell MD \$349	Amber
7. Dermis Pigment	"This layer sits deeper. It's a longer conversation — and I'd rather be honest with you now than oversell you."	"Same treatment, same timeline."	MD series 3x \$940 6x \$1,675	Amber
8. Brown Area	"This shows how evenly your tone is distributed. Evenness is what reads as 'glow' — more than brightness does."	"Your skin is discolored."	Glo2Facial \$195 Luxe Rose \$120	Amber Aundrea
9. UV Damage ★	"Your skin in normal light looks great. Now watch — this is the UV channel. Everything you're seeing is sun that's already banked. Nothing here is urgent. But it's the argument for starting maintenance <i>now</i> rather than correction in five years."	"This is sun damage we can reverse."	ProCell MD \$349 Daily SPF (retail)	Amber
10. Melasma △	"This pattern is consistent with melasma. That matters, because melasma is heat-reactive — the aggressive treatments people expect actually make it worse. We go slower on purpose."	"We'll clear your melasma." — and never sell aggressive treatment on a melasma flag.	△ CONSULT FIRST Gentle only: Glo2Facial · Skin Script	Amber → Diana

★ **UV DAMAGE IS THE SECOND MONEY SLIDE** — and the one that converts the "my skin is fine" client. Nothing else on the machine makes a 35-year-old book a series. In Florida this number is never zero.

△ **MELASMA IS A BRAKE, NOT A GAS PEDAL.** Heat and aggression rebound melasma. Do **not** upsell aggressive microneedling in the moment. Say: "*I want Amber to look at this before we choose anything.*" Downgrading the sell here **builds** trust — and still books the consult.

GROUP C — VASCULAR & SENSITIVITY (the calm-it-down lane)

INDICATOR	SAY THIS	NEVER SAY	BOOK	WHO
11. Sensitive Area	"Your redness map shows reactivity here. Before we do anything corrective, we want your barrier calm — otherwise we're building on sand."	"You have rosacea." — NEVER diagnose.	LED +\$35 Glo2Facial \$195 GlyMed+ barrier	Brandy
12. Spider Vein	"Those are dilated capillaries. I'll be straight with you — we don't have a device that removes those here. What we <i>can</i> do is keep them from recruiting more."	"We'll get rid of those." We have no vascular laser.	Barrier support Refer out	Honest referral
13. Thermal Map	"This is your heat map. Heat is the enemy of pigment and the enemy of a calm barrier — it tells me how gently to work on you."	"You're inflamed / you have an inflammatory condition."	Informs protocol — not a standalone sale	All

Spider veins are your trust play. Saying "we can't do that here" out loud, unprompted, buys credibility for every yes that follows. Do not fudge it.

GROUP D — TEXTURE, AGING & HYDRATION (the regenerative lane)

INDICATOR	SAY THIS	NEVER SAY	BOOK	WHO
14. Acne	"Here's what's active right now — versus the porphyrin map, which is what's <i>coming</i> . Two different problems."	"We'll clear your acne."	Acne Bootcamp \$899 Face Reality	Amber
15. Wrinkle ★	"Two kinds here. Lines that appear when you <i>move</i> — that's muscle, that's Diana's lane. Lines that sit there <i>at rest</i> — that's collagen, that's mine. Most people are doing one and wondering why the other didn't budge."	"This will remove your wrinkles."	Dynamic: Tox \$14/unit Static: Microneedling Corrective \$295 · PRF \$595	Diana ↔ Amber
16. Texture	"Texture is the fastest-moving number on this whole report. It's also the one you'll <i>feel</i> before you see."	—	Dermaplane +\$45 BioRePeel · Glo2 \$195	Amber Brandy
17. Collagen	"This is a density <i>estimate</i> . It's the number that responds to series , not to single visits — collagen is built, not applied."	"This measures your actual collagen level."	MD 3× \$940 / 6× \$1,675 Sculpt & Lift \$180	Amber Diana
18. Moisture	"Dehydration is the great faker — it makes lines, pores, and dullness all read worse than they are. Fix this first and half the report improves."	"You have dry skin." (dry ≠ dehydrated)	Glo2Facial \$195 Hydration IV \$100	Amber Diana

★ WRINKLE IS THE CROSS-REFERRAL ENGINE. The only indicator that splits cleanly across two providers. **Always name both.** That one sentence sells two appointments and sounds like honesty — because it is.

FUTURE AGING SIMULATION — the closer. Not an indicator. It's the **series close**. Run it **last**, after you've already agreed on a plan. *"This projects the trajectory of what we just talked about if nothing changes. It's a model, not a prophecy — but it's built from your actual scores. And it's exactly why I'd rather put you on a three-visit plan than sell you one facial today."* → Then present the **3× series**. Never present the single first.

UPSELL LADDER — READ THE REPORT, PICK THE RUNG

IF THE WORST SCORE IS...	ENTRY (YES TODAY)	STEP UP (THE REAL ASK)	PROGRAM (THE GOAL)
Porphyryns · Comedo · Acne	Skin Reset Facial \$140	ProCell Pro \$250	Acne Bootcamp \$899
UV Damage · Pigment	Glo2Facial \$195	ProCell MD \$349	MD 6× \$1,675
Wrinkle — dynamic	—	Tox \$14/unit (Diana)	Tox + microchanneling cadence
Wrinkle — static · Collagen	Sculpt & Lift \$180	Microneedling Corrective \$295	MD 6× \$1,675 or PRF \$595
Texture · Pores	Dermaplane +\$45	Glo2Facial \$195	ProCell Pro 3× \$675
Moisture	Glo2Facial \$195	Hydration IV \$100	Beauty Glow IV \$185
Sensitivity · Redness	LED +\$35	Barrier homecare	Gentle facial cadence
⚠ Melasma	CONSULT ONLY. Do not upsell aggressive treatment in the moment.		

Add-ons — ask every time. Easiest yes on the menu.
Dermaplane prep **+\$45** · LED **+\$35** · Glo2 Finish **+\$95** · Topical PRF (face) **+\$175** · Neck & Décolleté **+\$95**

RETAIL ATTACH — THE REPORT WRITES THE PRESCRIPTION

SCORE DRIVING IT	BRAND
Porphyryns · Acne · Comedo	Face Reality — acne-safe protocol
UV Damage · Brown Area	Skin Script brightening · daily SPF
Sensitive Area · Moisture	GlyMed+ barrier support
Post-microchanneling	ProCell homecare — protects the investment
Post-treatment coverage	Jane Iredale — mineral, treatment-safe

"I'm not going to hand you a shelf. Your porphyrin number is what's driving this, so there's exactly *one* line that matters for you right now."

PROVIDER LANES — WHERE A SCAN ROUTES

LANE	PROVIDER	OWNS
Advanced facials	Amber	Microchanneling · Microneedling · Glo2Facial · ProCell MD/Pro · BioRePeel · Dermaplane · Carboxy · PRF topical only — no injections
Injectables · IV · GLP-1	Diana, RN	Tox · Filler · PRF injections · IV Hydration · Semaglutide / Tirzepatide
Basic facials	Brandy	Relaxing / maintenance facials · enzymes · hydrodermabrasion · light peels · facial waxing
Waxing · Lashes · Makeup	Aundrea	Body + facial waxing · lash lift & tint · makeup · permanent jewelry · the 3 Rose facials

Cross-referral is not optional. If the scan lands outside your lane, hand it off in the room — "let me get you in front of Diana for that." A scan that produces two bookings is the machine paying for itself.

OBJECTION HANDLES

Honesty converts better than pressure. Every line below is true.

THEY SAY	YOU SAY
"My skin's fine, I don't need this."	"Agreed — and the scan is free of pressure. Let's just get a baseline so that in five years you have something to compare against. That's the whole value."
"Is this just to sell me something?"	"It's the opposite. It's how I tell you what <i>not</i> to buy. Half of what I say today is going to be 'don't do that yet.'"
"That's a lot of money."	"It is an investment, and I'd rather you do three visits properly than six visits halfway. Skin transforms through timing and consistency — the number isn't the treatment, the structure is."
"Can you just do one and see?"	"We can. I'll be honest that one visit moves texture and moisture, and doesn't move collagen or pigment. If those are your top three, one visit is going to disappoint you — and that's not a good day for either of us."
"Will this get rid of my [X]?"	"It's designed to improve the <i>appearance</i> of it. Individual outcomes vary, and your provider confirms candidacy. What I <i>can</i> promise is we rescan at 90 days on the same machine — and you'll see exactly what moved."

HARD STOPS

Compliance outranks copy polish, every time.

Never say the machine **diagnosed** anything. It **scored appearance**.

Never say **treat · cure · heal · clear · eliminate · permanent · guaranteed**.

Never say "you have rosacea / melasma / an infection." Say **"this pattern is consistent with..."** and refer to the provider.

Never promise **spider vein removal** — we have no vascular device. Say so out loud; it buys trust.

Never upsell **aggressive treatment on a melasma flag** in the moment. Consult first.

Never say **discount · deal · % off · sale**. Say **investment · from · starting at**.

Never save a client photo or report to a personal device. Cloud / tablet only, consent on file.

Before/after images require **written consent** on file.
